MycorTree® Injectable:

*INJECTABLE MYCORRHIZAL FUNGI FOR ENDO AND ECTO TREES
AND SHRUBS*

Another Best Seller! For use with soil injection equipment. Ideal for rapid, effective endo/ectomycorrhizal inoculation for all established trees and shrubs except azalea/rhododendron/mountain laurel. Also contains beneficial rhizosphere bacteria and Colonize™, a patented mycorrhizal stimulant that enhances root colonization by VAM fungi. A great treatment for trees in decline or suffering from environmental stresses.

Mycor™ Tree Saver® Transplant:

MYCORRHIZAL FUNGI WITH TERRA-SORB FOR PLANTING

Tree Saver is a mycorrhizal fungal inoculant for planting trees and shrubs. This product can significantly reduce loss and decline due to poor soil conditions and drought. Also contains Terra-Sorb hydrogel and organic soil conditioners.

Mycor™ Plant Saver® 4-7-4:

MYCORRHIZAL FUNGI MULTI-PURPOSE PLANTING FORMULA

The ideal 5-in-1 planting product for landscapers that want lots of goodies without any hydrogel. Plant Saver contains endo/ectomycorrhizal fungi, beneficial bacteria, nutrients, soil conditioners and micronutrients.

Healthy Start® 12-8-8 Macro Tablets:

EASY TO USE, SLOW-RELEASE BIOFERTILIZER TABLETS

Biofertilize when planting trees and shrubs for up to two years. These bio-planting tablets help replenish depleted soils with slow-release nutrients and beneficial microbes to promote long-lasting, soil fertility. Contains rhizobacteria, fertilizers, soil conditioners and seaweed meal. Available in 7 gram and 21 gram tablets.
